# STORED TRANSCRIPT

Source: existing stored transcript. Timing is not inferred.

Hello world. Hi. Wait, let me show you how I did it. First, I hang the carpet using a C-stand. Then, I clip an Amaran Ace 25c above it to bring out the pattern. Second, another Ace 25c goes behind me at around 45 degrees, just to add a little bit of a rim light on my face. Quick tip: make sure you have a good amount of distance between you and the carpet, like around 1 km away. And lastly, my main light, Ray 360c, paired with an Amaran Light Dome, to light up my beautiful face. Still confused? Follow for more content like this. Comment "carpet", I'll send a full guide and the camera settings.
